Education

Pamantasan ng Lungsod ng Maynila BS in Computer Science <i>Tertiary Education - Magna Cum Laude, GWA: 1.35 (Expected Graduation: Aug. 2026)</i>	Sept 2022 – Present
Universidad de Manila STEM Strand <i>Senior High School - Graduated with High Honors, GWA: 95.0</i>	Oct 2020 – July 2022

Skills

Programming Languages: Java, SQL, C, Python, Go, x86 Assembly, JavaScript, TypeScript, HTML, CSS

Machine Learning PyTorch, TensorFlow, timm, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, SciPy

Backend Development: MySQL, PostgreSQL, Django, Flask, ExpressJS, FastAPI, Firebase, Supabase

Frontend & Other Tools: ReactJS, NextJS, Tailwind CSS, JavaFX, Git, Android Studio, Figma, Vercel, Ollama

Experience

National Cheng Kung University <i>Research Intern</i> <i>Computer Vision and Multimedia Laboratory, Tainan, Taiwan</i> International Research Collaboration with NCKU's Computer Vision and Multimedia Laboratory, finetuning ResNet-50 w/ multi-scale transformers for Pulmonary Lung Nodule Detection on Chest X-ray images as part of undergraduate thesis; published on MDPI's Q1 Journal of Diagnostics.	Oct 2025 – Nov 2025
Goldilocks Bakeshop, Inc. <i>IT Service Management Intern</i> <i>Main Office, Greenfield Building, Mayflower St. corner Williams, Mandaluyong City</i> Assisted in maintaining IT infrastructure while also coordinating service requests such as technical support for hardware & software issues, streamlining issue resolution workflows across departments.	June 2025 – July 2025

Projects

(Machine Learning) Atlas990 (2026)

- Cleaned raw public IRS Form 990 tax data into an optimized Parquet format
- Developed a full-stack web application that uses an XGBoost model to calculate a 0–100 priority score for nonprofit leads and integrates Meta's FAISS library to instantly find matching lookalike organizations.
- Stack: React, Vite, TypeScript, FastAPI, Pandas, NumPy, scikit-learn, XGBoost, FAISS

(Deep Learning) Pulmonary Lung Nodule Detection System (2026)

- Developed, trained, and finetuned a ResNet-50 deep learning model enhanced with light transformer blocks per stage for early lung cancer screening on chest X-rays as part of undergraduate thesis.
- Stack: Python, PyTorch, OpenCV, Pandas, NumPy

(Web Crawler) TrabaHound (2026)

- Developed a comprehensive job aggregation platform featuring a Next.js and TypeScript frontend, serverless APIs, and a Python crawler Jobspy.
- Implemented PDF parsing and LLM-based resume analysis for enhanced job matching.
- Stack: NextJS, TypeScript, Python, Jobspy, LLMs, PDF Parsing

(Full-Stack) MAFA-Inventi (2025)

- A property management system developed for the Inventi Hackathon enabling property managers to upload floor plans, pin issues, and efficiently manage properties, tenants, and maintenance.
- Implemented an LLM-based dashboard analysis.
- Stack: ReactJS, Tailwind CSS, NodeJS, ExpressJS, Supabase, Vercel

(Full-Stack) Bilandog Corporation E-commerce Website (2025)

- A personal project developed for a fictional e-commerce business to improve proficiency in Full-Stack Web Development, practicing RESTful principles and database design.
- Stack: Django, PostgreSQL, NodeJS, NextJS, TailwindCSS

(Full-Stack) Fantasy Flip Memory Game Android Application (2024)

- Lead developer for an Android mobile game, handling both frontend and backend logic.
- Stack: Java, XML, Firebase Realtime Database, Android Studio

(Full-Stack) DOM Compiler (2024)

- Lead developer for the DOM programming language, designed with custom personalized syntax and keywords to meet Compiler Design course requirements.
- Stack: NextJS, Tailwind CSS, Flask, React, NodeJS

Extracurricular

- **Data Engineering Pilipinas | DataCamp Scholar**
DataCamp x Data Engineering Pilipinas Partnership Scholar 2026
- **Inventi Asia Hackathon | Creativity Award Winner**
Smart Property Solutions Hackathon 2025
- **Google Developer Student Club (GDSC) Volunteer | Web Development Team**
October 2024 – October 2025
- **Google Developer Student Club (GDSC) Volunteer | Design and Branding Team**
November 2023 – October 2024
- **DSPC Annual Journalism Competition | 3rd Place Winner in Online Publishing (English)**
Manila Division Schools Press Conference 2019

Publications

- Bilan, E. F., Manduriaga, E. T., et al. (2026). RNNet-MST: A ResNet-50 with Multi-Scale Transformer Blocks for Pulmonary Nodule Classification and Attention-Based Localization on Chest X-Ray Images. *Diagnostics*, 16(10), 1574. DOI: 10.3390/diagnostics16101574
- Undergraduate thesis developed through a PLM–NCKU international research collaboration with the Computer Vision and Multimedia Laboratory at National Cheng Kung University, Taiwan.
 - Published in MDPI Diagnostics, a Q1 peer-reviewed journal, indexed in Web of Science and Scopus.
